

NEW PRODUCT!

Leveling Mounting Foot

FOR LEVELING LIGHTBARS ON CURVED ROOF VEHICLES

Slotted bolt keyway for quick easy adjustment

Wide-stance, rugged polycarbonate mounting foot

Snap-in one piece rubber pads

Now you can easily mount and level your Whelen lightbar on sloped roof vehicles for proper alignment and maximum lighting performance.

Modern aerodynamic roof lines on late model vehicles can alter the orientation of your lightbar and affect proper lighting performance, especially with today's high intensity LED directional lighting. New rugged polycarbonate mounting feet include slotted bolt keyway which allows for simple correction to the "parallel to the road" orientation.

All models come with two foot brackets and applicable hardware.

No matter what the vehicle's roof slope angle this leveling mounting foot adjusts to achieve perfect horizontal lightbar alignment.

Lightbar Leveling Mounting Foot
