Tracer[®] Series

Super-LED[®] Light Array (Patent Pending) Preliminary

Available Spring 2015

Whelen's Tracer Series is designed for maximum versatility and easy reconfiguration. Program numerous intensity levels with the cruise light function. Utilize Whelen's revolutionary TRIO™ technology with multiple flash patterns and a steady white override. As always, Whelen's products are designed and engineered for the highest quality and long life reliability.

Features

- Available in SOLO™ (single color), DUO™ (two color interleaved) or TRIO (three color interleaved) modules
- Available in Red, Blue, Amber and White
- Multiple Scan-Lock™ flash patterns
- DUO and TRIO models feature steady white override (when White is selected as the second color in a DUO model)
- Cruise light control includes adjustable intensity levels
- Easily serviceable clamshell design
- Mounts easily via slide bolt with vehicle specific brackets
- Hard Coated lenses resist environmental damage
